

Department of Energy

Washington, DC 20585

March 1, 1996

The Honorable John T. Conway
Chairman
Defense Nuclear Facilities Safety Board
625 Indiana Avenue, N.W., Suite 700
Washington, D.C. 20004

Dear Chairman Conway:

In a letter from Secretary O'Leary dated January 11, 1996, you were notified that a Revised Implementation Plan for Recommendation 93-5 would be submitted on January 21, 1996. This revision led to a comprehensive review of tank safety and disposal program strategies and took longer than expected. The revised Plan is presently being reviewed within the Department, and we expect to submit it to you in April.

We have provided draft versions of the Plan to appropriate members of your staff and have kept them apprised of our progress. We have incorporated several of their suggestions and appreciate their cooperation.

Thank you for your continued interest in our tank characterization program. If you have any questions or need additional information, please call me at 202-586-7710.

Sincerely,

A handwritten signature in dark ink, appearing to read "Richard J. Guimond".

Richard J. Guimond

Assistant Surgeon General, USPHS
Principal Deputy Assistant Secretary
for Environmental Management
