

**Department of Energy**  
**National Nuclear Security Administration**  
Washington, DC 20585

June 30, 2003

OFFICE OF THE ADMINISTRATOR

The Honorable John T. Conway  
Chairman  
Defense Nuclear Facilities Safety Board  
625 Indiana Avenue NW, Suite 700  
Washington, D.C. 20004

Dear Mr. Chairman:

This letter provides you with an updated status on Department efforts to revise and re-issue the Nuclear Air Cleaning Handbook, a deliverable associated with the Department's 2000-2 implementation plan. As you know, the current revision is the first one in over 25 years. On December 2, 2002, the Department advised you that the handbook would be delayed due to the large number of technical comments received on the draft handbook and the Department's overall objective to deliver a high quality technical product. We continue to make progress toward resolving these comments and now project issuance of the handbook in September 2003.

At this time, we have completed preliminary resolution of the comments received on the handbook and we are currently re-reviewing these resolutions with the comment providers to verify the adequacy of the proposed resolutions. We have provided a copy of the current version of the Nuclear Air Cleaning Handbook to your staff for information. Your staff has been helpful to us in addressing some of the comments received.

If you have any questions please contact me at 202-586-8395 or have your staff contact Jim Slawski at 301-903-5464.

Sincerely,

A handwritten signature in black ink that reads "James J. Mangeno".

James J. Mangeno, Senior Advisor  
for Environment, Safety and Health
